Ordu Glory Ugochukwu

✉ gloryordu2020@gmail.com 08100639510 Port Harcourt, Rivers State

Summary

Reliable and motivated IT professional with experience in technical support, system administration, and ICT operations. Skilled in troubleshooting hardware, software, and network issues, supporting users, and maintaining computer systems. A quick learner with strong communication, problem-solving, teamwork, and organisational skills, with the ability to adapt to new technologies and work effectively in a professional environment.

Professional Experience

IT Intern 09/2026 – Present
Peter Odili Hospital Rivers State

- Provide day-to-day technical support to staff and assist with resolving computer, software, printer, and connectivity issues.
- Install, configure, update, and troubleshoot computers, printers, approved applications, and other IT equipment.
- Assist with basic LAN, Wi-Fi, and internet connectivity checks and escalate complex network faults when required.
- Support user account setup, password resets, system access requests, and other routine IT administration tasks under supervision.
- Perform routine computer maintenance, software updates, antivirus checks, and basic hardware diagnostics.
- Document IT incidents, support requests, troubleshooting steps, and equipment details for follow-up.
- Help maintain IT asset records and follow security, confidentiality, and safe equipment-handling procedures.

System Administrator (Industrial Training) 04/2025 – 10/2025
Federal College Of Education Technical Omoku, Rivers State

- Assisted with the installation, configuration, and maintenance of computers, servers, and other ICT equipment.
- Provided technical support to staff and students, troubleshooting hardware, software, and network-related issues.
- Supported user account creation, access permissions, password resets, and basic system administration tasks.
- Monitored network and system performance and reported technical issues to senior administrators.
- Assisted with software updates, system backups, antivirus management, and routine maintenance.
- Maintained ICT records, documented support activities, and followed institutional IT policies and security procedures.
